JOB ANNOUNCEMENT

Established in 1998, CropDesign is one of the worldwide leading, innovative biotech companies, focusing on the improvement of crops. Our aim is to obtain higher yield, increased tolerance to stress and better nutrient utilization. The company applies genomics, informatics and robotics technologies. We employ more than 100 motivated employees and occupy state-of-the-art laboratories and an automated greenhouse complex in Nevele. CropDesign is a subsidiary of BASF Plant Science. Together with 6 other research centres across the world, we form the global research platform of BASF Plant Science.

We are currently looking for a

Data Analyst

With the hiring of a data analyst CropDesign wants to complete its team of biometricians that is responsible for experimental design and data analysis in the field of agricultural crops. The data originate from laboratory, greenhouse and field experiments being part of a larger plant screening program.

The Data Analyst will assist in the preparation and the analysis of agronomic data of field and greenhouse trials under the supervision of experienced biometricians. He/she will also assist in the interpretation of results and report the results to biologists.

Requirements:

- Showing a keen interest in data analysis and statistics
- Having some experience with analysis of variance and regression techniques
- Willing to learn more about other statistical methodologies
- Having some experience in computer programming and databasing
- Being fluent in English
- Showing flexibility in sharing workload with the other team members
- Having a master degree in a relevant field, or a bachelor degree with some relevant working experience
- Experience with the statistical language R or experience in plant biotechnology will be highly appreciated

Offer:

We offer you a challenging job in a dynamic and international environment in one of the worldwide leading plant biotech companies. You will receive an indefinite contract and an attractive compensation package in line with responsibilities and experience.

If this job interests you, all you have to do is send your resume to jobs@cropdesign.com, referring to this vacancy. Should this job not completely appeal to you, you can always apply spontaneously by submitting your curriculum vitae to the company's HR department (jobs@cropdesign.com).
