JOB ANNOUNCEMENT

Established in 1998, CropDesign is one of the worldwide leading, innovative biotech companies, focusing on the improvement of crops. Our aim is to obtain higher yield, increased tolerance to stress and better nutrient utilization. The company applies genomics, informatics and robotics technologies. We employ more than 100 motivated employees and occupy state-of-the-art laboratories and an automated greenhouse complex in Nevele. CropDesign is a subsidiary of BASF Plant Science. Together with 6 other research centres across the world, we form the global research platform of BASF Plant Science.

We are currently looking for a

Applied Genetics Associate

This is a new function in the existing “development” group of CropDesign.

It concerns a supporting function with a.o. following tasks:

- Support the Development Manager and Technical Applied Genetics Manager
- Assist in preparation of multiplications and field trials of rice
- Inventory management
- Data cleaning
- Preparing sampling in the field
- Preparing and shipping seed samples
- Coordination and control QC of seeds

Profile:

- Showing a keen interest in plants
- Having a bachelor degree in a relevant field, or some relevant working experience
- Accuracy is a must
- Having a good knowledge of Excel, Word, PowerPoint and other database software
- Being fluent in English
- Having a basic knowledge of statistics and field trailing is certainly an asset

Offer:

We offer you a challenging job in a dynamic and international environment in one of the worldwide leading plant biotech companies. You will receive an indefinite contract and an attractive compensation package in line with responsibilities and experience.

If this job interests you, all you have to do is send your resume to jobs@cropdesign.com, referring to this vacancy. Should this job not completely appeal to you, you can always apply spontaneously by submitting your curriculum vitae to the company's HR department (jobs@cropdesign.com).
